A rather dull reinvention (or should i better say reskin?) of always the same game engine from this developer.

The enemy waves are very unbalanced. To get three star rating in every level you have to grind A LOT, wich meanchs playing the same boring levels over and over and over and over and over again. The loading takes forever and the loading screen itself is still in a 4:3 ratio. The backgrounds are completely static and the animation of the enemies is overly simple. The music sounds like 8 Bit or 12 Bit in sound quality and there is only a handfull of sound effects.

Why would you play this, when you can play any of the Kingdom Rush series?

The only positive about it is that achievements are relatively easy to accomplish. 50% of them can be done in the first level and you will get all of them soon before even thinking about completing the whole game. This itself is no achievement. Thank god.. I read the comments before buying the game but i have no regret. If you appreciated Kingdom rush, this game will satisfy you. The music is nice, difficulty is balanced. Lot of TD can't claim to be such a good distraction.. For 0,49 Euros I really enjoyed it. It gave me what i want from a game - fun time.

EDIT: I got base game only.
