One of those games that has been swept under the rug and deserves more attention than its getting.. My summary in 4 sentences:  
The idea of the game is stupid to me.Timed dungeon game with exploring?I'm sorry,but I made like 10 legit attempts,all ending because the time ran out.The pixel graphics dont look good,the game lagged ocasionally.. this game isn't fun at all. if you're

lucky to get the right weapons, you're good. but if you don't. you're screwed. and on top of that, if you get a good weapon, it has a much too low durability. so most of the game depends on your luck. and on top of all that, you also have a time limit and the enemies are way too strong. there is also no possibility, to upgrade your character to make him stronger, run faster and so on.. I absolutely loved every second of this game.. never like indie. But played this game with pleasure. Nice way to spend 1-2 hours with friends.. very fun game. This game is really well made for both a couch party and solo play. Maybe it's just me but this game is very well done for a 5 euro game. Anyway, you shouldn't stop patching. This game deserves attention. It's good.
